About Cambium Networks

Cambium Networks provides wireless broadband networking infrastructure solutions for network operators, including medium-sized wireless Internet service providers, enterprises and government agencies. Cambium's scalable, reliable and high-performance solutions create a purpose-built wireless fabric which connects people, places and things across distances ranging from two meters to more than 100 kilometers, indoors and outdoors, using licensed and unlicensed spectrum, at attractive economics. Headquartered outside Chicago and with R&D centers in the U.S., U.K. and India, Cambium Networks sells through a range of trusted global distributors.
