

Cambium Networks

Third Quarter 2020

Safe harbor/forward looking statements

This presentation and the accompanying oral presentation contain forward-looking statements. All statements other than statements of historical fact contained in this presentation, including statements regarding future operating results, the financial performance and position of Cambium, Cambium's business strategy, and plans and objectives for future operations, introduction of new solutions or products, expansion into new markets, regulatory compliance, expectations regarding outstanding litigation, technological capabilities, and strategic relationships, as well as assumptions relating to the foregoing, are forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "could," "expect," "plan," "anticipate," "believe," "estimate," "predict," "intend," "potential," "would," "continue," "ongoing," "project," "target," or the negative of these terms or other comparable terminology. You should not rely on any forward-looking statements. Forward-looking statements should not be read as a guarantee of future performance or results, and will not necessarily be accurate indications of the times at, or by, which such performance or results will be achieved, if at all. Cambium has based these forward-looking statements on its estimates and assumptions and its current expectations and projections about future events. These forward-looking statements are subject to substantial risks, uncertainties and assumptions, some of which cannot be predicted or quantified. These risks include the difficulty in predicting Cambium's operating results, which may fluctuate significantly; Cambium's ability to respond to emerging technological trends and introduce new products and technology; Cambium's dependence on third-party manufacturers; Cambium's reliance on distributors and value-added resellers to promote and sell Cambium's products; and risks presented by the global COVID-19 pandemic, which could significantly disrupt our manufacturing, sales and other operations and negatively impact our financial results. In addition, Cambium operates in a very competitive and rapidly changing environment. Forward-looking statements are based on information available at the time those statements are made and/or management's good faith beliefs and assumptions as of that time with respect to future events. New risks emerge from time to time. It is not possible for Cambium's management to predict all risks, nor can Cambium assess the impact of all factors on its business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements that Cambium may make. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this presentation are inherently uncertain and may not occur, and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements. Accordingly, you should not rely upon forward-looking statements as predictions of future events. These risks and uncertainties may be described in greater detail in the "Risk factors" section of our 2019 Form 10-K filed with the Securities and Exchange Commission on March 23, 2020. Our forward-looking statements relate only to events as of the date on which the statements are made. Except as required by law, Cambium does not undertake any obligation to update or revise any forward-looking statements for any reason after the date of this presentation, whether as a result of new information, future developments, to conform these statements to actual results or to make changes in Cambium's expectations or otherwise.

This presentation contains statistical data, estimates and forecasts that are based on independent industry publications, such as those published by Cisco Visual Networking Index, International Data Corporation, Inc., QYResearch, and Sky light Research, LLC, or other publicly available information, as well as other information based on our internal sources. This information involves many assumptions and limitations, and you are cautioned not to give undue weight to these estimates. We have not independently verified the accuracy or completeness of the data contained in these industry publications and other publicly available information. Accordingly, Cambium makes no representations as to the accuracy or completeness of that data nor does it undertake to update such data after the date of this presentation.

Cambium is an "emerging growth company" as defined under the Securities Act of 1933, as amended (the "Act"). This presentation and the accompanying oral presentation are made pursuant to Section 5(d) of the Act. This presentation and the accompanying oral presentation shall not constitute an offer to sell or the solicitation of an offer to buy these securities, nor shall there be any sale of these securities in any state or jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state or jurisdiction.

Cambium – a Leader in Wireless Network Fabric

Scalable

Global, next-gen wireless infrastructure leader

Differentiated

Purpose-built wireless technology for mid-sized service providers and mid-market enterprises

Capital Efficient Growth

~8,000 channel partners worldwide¹;
12% Adj. EBITDA margin

Note: Please refer to appendix for reconciliation of non-GAAP metrics

Focused on Growing Markets of Mid-Sized Service Providers and Enterprises That Are Traditionally Underserved

Competitive Advantages Driven by Scalability, Unit Costs, Quality and 24/7 Support

Mid-Sized Service Providers¹

- ✓ 2x spectral efficiency
- ✓ 24/7 enterprise-class support
- ✓ Scalable networks

SME / Mid-Mkt Enterprises

- ✓ 24/7 enterprise-class support
- ✓ Durability and reliability
- ✓ Cloud performance and functionality

Government

- ✓ Highly ruggedized
- ✓ Unparalleled quality
- ✓ Purpose-built products

Industrials

- ✓ Cloud-based network mgmt platform
- ✓ Integrated wireless fabric portfolio
- ✓ Durability and reliability

Results in attractive economics for our customers

Illustrative Network Build-Out Cycle

Mid-Sized Internet Service Providers

Phase 1: Core buildout

- PTP infrastructure for Backhaul
- PMP AP infrastructure for launch geography
- Initial subscriber rollouts
- cnMaestro Basic

Phase 2: Geographic expansion

- PTP as required to support new sites
- PMP infrastructure paced to geographic expansion
- cnMaestro Pro
- Accelerating software demand

Phase 3: Subscriber density

- Infrastructure limited to support density
- Ongoing subscriber demand

Industrial

Wi-Fi / Enterprises
